Re: Freshwater Wetlands
Determination & Delineation
Frontier Wetland
Town of Pendleton-Niagara County
DEC #932-11-0076

Dear Mr. Schmiede:

In response to your June 6, 1979 letter a Department biologist inspected the subject area on June 21, 1979. Consequently, this office has determined that the 50+ acre area shown on the attached Locator Map is a wooded wetland, including emergent marsh and wet meadow vegetation, subject to regulation in accordance with Article 24 (Freshwater Wetlands) of the Environmental Conservation Law. Typical wetland vegetation observed on-site include willows, red ash, green ash, silky dogwood, broad and narrow leaf cattail, sedges, and soft rush.

Therefore, a N.Y.S. Freshwater Wetlands Permit must be obtained prior to conducting certain activities, such as: excavation, filling, etc., within the wetland and/or within the one hundred foot wide area adjacent thereto. Enclosed for your reference is an aerial photograph entitled "Frontier Chemical, Pendleton, N.Y." with the approximate edge of the wetland proper drawn thereon. We trust that this delineation is suitable for your use in determining the wetland area under this department's jurisdiction pursuant to Article 24.

Should you have any questions concerning this matter, please do not hesitate to contact Mr. Paul Eismann or me at the above number. Thank you.

Respectfully,

Steven J. Daleski
